TOBACCO FOR DISEASE OF THE THROAT .- The Boston Medval and surgical Journal makes the following observations nareview of Sir Benjamin Brodie's letter in the London Times on the "Use and Abuse of Tobacco": "There is a on effect of tobacco, when smoked, which we have not be of considerable importance. We refer to its action in preventing that peculiar condition of the throat which, if eglected, is able to terminate in follicular inflammation, or what is properly known as clergyman's soar throat. It has been said that few, if any, instances of this affection can be ound to exist in those in the habit of smoking, and we know fone or two instances where it yielded at once to the pocommencing irritation, which, if allowed to increase, would ed in inflammation; and, perhaps, by counteracting any pasmodic condition of the surrounding muscles-a very usural source of trouble in this distressing disease."

Obiteary. The late Dr. FREDERICK JONES HILL was born in the county of New Hanover, in 1792. By birth a member of an extensive connection long known to the Cape Fear for opulence and refinement, and to the State by brilliant public services, the influences to which his youth was subject were pure and saintary.

After spending some time under the famous Chatham teacher, William Bingham, he matriculated at Chapel Hill. He studied medicine under Dr. Nat. Bill. and graduated in New York at the College of Physicians and Surgeous in 1811. In conjuction with Dr. Nat. Hill and Dr. James Henderson, he practiced his profession some years in Wilmang-

The Doctor's patrimony had been small, his share of the receipts of the medical partnership could not have been large. With the sagacity for which he was ever remarkable, he resolved to secure an estate necessary to happine and usefulness, by abandoning his profession. He purchased Orton, a fine plantation on the Cape Fear; there he planted rice, and erected saw-mills. He had the qualities that peculiarly fit one to be a successful practitioner; that rare discernment, and that cool judgment which are strangely denominated common sense, when in union. It is not to be doubted but that he would have obtained fame as a physician had he devoted his life to his profession. As a planter, the Doctor's affairs were directed with untiring perse verance, energy and skill, and he soon reaped his reward in golden harvests. He did not neglect the duties which every gentleman owes society, but devoted himself so assiduously and exclusively to his domestic interests that he became known generally as a practical, hard working, successful man, devoid of ambition. When, however, he had laid the oundations of a fortune large enough for his purpose, his old habits fell from him as a disguise, and it was seen that here was nothing sordid about him. The gain he had pursued subserved love, charity and public interests. It then appeared that he was not without ambition—but it was with him not a fire to rage and blacken the soul, but a genial flame, chastened and governed by a firm will-a desire to be useful, to win the affections-not to extort reluctant ad-

Henceforth Dr. Hill began to take a deeper interest in all public affairs. In the Convention of 1835, to revise the Constitution, Dr. Hill represented Brunswick; in the General Assembly he often represented the same constituency.

He was a delegate to the Harrisburg Convention that nominated General Harrison. Such was the weight of the North Carolina representatives upon that occasion, that the nomination of Vice-President was tendered them, and declined with characteristic modesty. Dr. Hill was urged by his friends for Governor of the State -a post for which he was eminently fitted- and was a

prominent candidate when the Hon. ( harles Manly became | the compromising nominee, Dr. Hill declining. As a member of the Assembly, he was regarded by his party, (in popular phraseology,) as a wheel horse-not shinng in debate, but ever attentive, industrious, well-informed. and almost incomparable in that obscurer, but more important field of action, the committee-room. He was so warm, so consistent, so zealous and able an advocate of commonschools, that when the labors of good men bore fruit, he was esteemed the father of the s, stem. With no tendency to Rome, his views were decidedly pronounced that his was a protestant, though apostolic church. In 1811, Dr. Hill married Ann Ivie, the daughter of Mr.

William Watters, and grand-daughter of Gen. James Moore. Childless himself, he supplied a fathers' place to several orphans-how well their affection and gratitude, elequently testify. Dr. Hill died at 4 o'clock, A. M., March 27th, 1861, in Wilmington; and was interred in Oakdale Cemetery. THE ONLY DISCOVERY WORTHY OF ANY CONFIDENCE FOR RESTORING THE BALD AND GRAY

Many, since the great discovery of Prot. Wood, have attempted not only to imitate his restorative, but profess to have discovered something that would produce results idenhave been forced to leave the field to its resistless sway .-BATH, Maine, April 18th, 1859.

I rof. O. J. Wood & Co .: Gents :- The letter I wrote you n 1-56 concerning your valuable Hair Restorative, and which you have published in this vicinity and elsewhere, the case. The enquiries are, first, is it a fact of my habi tation and name, as stated in the communication; second. is it true of all therein contained; third, does my hair continue to be in good order and of natural color? To all I can and do answer invariably yes. My hair is even better than in any stage of my life for forty years past, more soft, thrifty, and better colored; the same is true of my whiskers, and the only cause why it is not generally true, is that the substance is washed off by frequent ablution of the face, when if care were used by wiping the face in close connection with the whiskers, the same result will follow as the bair. I have been in the receipt of a great number of letters from all parts of New England asking me if my hair still continued to be good; as there is so much fraud in the manufacture and sale of various compounds as well as this, it has, no doubt been basely imitated and been used, not only without any good effect, but to absolute it jury. I have not used any of your Restorative of any account for some months, and yet my hat is as good as ever, and hundreds have examined it with surprise, as I am now 61 sears old and not a gray hair in my head or on my tace; and to prove this fact, I send you a lock of my hair taken of the past week I received your favor of two quart bottles last summer, for which I am very grateful. I gave it to my friends and thereby induced them to try it, many were skeptical until after trial, and then purchased and used it with . niversal success. I will ask as a favor, that you send me a test by which I can discover fraud in the Restorative sold by many, I fear, without authority from you. A pure article will insure success and I believe where good effects do not follow, the failure is caused by the impure article, which corses the inventor of the good. I deem it my duty, as heretofore, to keep you apprised of the continued effect on my hair, as I assure all who enquire of me my unshaken opinion of its valuable results. I remain, dear sir yours,

A. C. RAYMOND, AARON'S RUN, Ky., Nov. 30, 1858. Prof. O. J. Woon: Dear Sir :- I would certainly be doing you a great injustice not to make known to the world, the wonderful, as well as the unexpected result I have experienced from using one bottle of your Hair Restorative. After using every kind of Restorative extant, but without success, and finding my head nearly destitute of hair, I was finally induced to try a bottle of your Restorative. Now, caudor and justice compel me to annource to whoever may read this, that I now possess a new and beautiful growth of hair, which I pronounce richer and handsomer than the original was. I will therefore take occasion to recommend this invalrable remeds to all who may feel the necessity

Respectfully yours, Rev. S. ALLEN BROCK. P. S .- This testimonial of my approbation for your valuwish, if not destroy and say nothing. Yours, Ac.,
